

Week 1: Introduction to Software Design

Overview

This week we have an overview of software design.

Objectives

The objectives of this week are:

- to gain general knowledge about software design
- to gain general knowledge about a “good” design

Outcomes

Upon completion of this module, you

- will have a general knowledge about this course and software engineering design

Task List

- It may be helpful to print this **Overview Page** and check off items as you complete them.
- You must have already clicked on "Course Information" (on home page) and followed the instructions.
- Read Chapter 1 of your textbook.
- Study slides for this week (“Introduction to SW Design.”)
- Go to Discussion tool and click on "Discussion LM1" to participate in this week discussion.
- Go to the Discussion area and click on "Your Weekly Feedback" and post your feedback/comments (if any) about this week module.
- ALWAYS CHECK FOR ANNOUNCEMENTS (at least 3 times a week).
