

Week 3: UML Activity Diagrams; Software Design Processes; Software Design Management

Overview

This week we cover activity diagrams, software processes, and software design management.

Objectives

The objectives of this week are:

- to learn about activity diagrams
- to learn about software processes and design management

Outcomes

Upon completion of this module you

- will have a general knowledge about activity diagrams, software processes, and software design management.

Task List

- It may be helpful to print this **Overview Page**, and check off items as you complete them.
- Read Chapter 2 of your textbook.
- Study slides for this week (“UML Activity Diagrams”) and (“Design Processes and Management.”)
- Go to Discussion tool, and click on "Discussion LM3" to participate in this week discussion.
- Go to Assignment tool, click on Assignment 1, follow the instructions and submit it by due date.
- [Go to the Discussion area and click on "Students' Weekly Feedback" and post your feedback/comments \(if any\) about this week module.](#)
- ALWAYS CHECK FOR ANNOUNCEMENTS (at least 3 times a week).
